

## COVID-19 Update #10: Essential Service Provider list

April 22, 2020 – 2:00

Many patients have reached out to us with questions about how to access urgent care during this pandemic. To address this concern, the College has created a directory of opticians who are currently providing urgent or essential care.

If you are a patient click [here](#) to see the list.

If you are registered optician and would like to be added to this list, please log into the [Member Portal](#) and follow the instructions. You can remove yourself from the directory or update your information any time by logging back into the portal.

We remind you that only essential and urgent care should be provided in-person and that measures be taken to ensure patient and practitioner health and safety.
