

## Masks are still required in Optical Dispensaries

Eyecare and the dispensing of eyeglasses and contact lenses falls under the umbrella of health care services. As such, your care and safety are of paramount concern to your Optician.

While restrictions on masking are easing in most settings, the provincial government still requires health care settings such as optical dispensaries to continue the use of appropriate face coverings until at least June 11, 2022.

***These measures remain in place to safeguard your health and safety.***
